## AI-Powered EV Journey & Charging Break Planner

Generated on 02 October 2026 at 09:47 PM

### 1. Journey Overview

|                |                          |
|----------------|--------------------------|
| From           | eluru                    |
| Destination    | vishakapatnam            |
| Route Distance | 294.38 km                |
| Travel Time    | 3.67 hours (220 minutes) |

### 2. EV & User Preferences

|                   |        |                   |        |
|-------------------|--------|-------------------|--------|
| EV Range          | N/A km | Battery           | 80%    |
| Budget            | ■N/A   | Connector         | Any    |
| Distance Priority | Medium | Fast Charging     | Medium |
| Food Required     | No     | Restaurant Radius | N/A m  |
| Avoid Tolls       | No     | Minimum Power     | N/A kW |

### 3. AI Journey Analysis

|                   |       |                 |           |
|-------------------|-------|-----------------|-----------|
| Charging Required | Yes   | Estimated Stops | 1         |
| Estimated Cost    | ■0.00 | Charging Time   | 0 minutes |

### Journey Summary

The journey from Eluru to Vishakapatnam covers a distance of 294.38 km and is estimated to take 3 hours and 40 minutes. The current battery percentage is 80%.

### Battery & Range Analysis

The EV range was not provided (stated as 0 km), therefore, the available driving range could not be accurately calculated. However, for a journey of 294.38 km, it is highly probable that at least one charging stop will be required to complete the trip safely, even with an initial 80% charge for most EV models. Based on this, charging is considered necessary.

### AI Recommendation

**Recommended Station:** Rajahmundry unit -1

The recommended charging station is 'Rajahmundry unit -1'. This station is strategically located with a very minimal detour of 2.6 km and offers high-power charging up to 240 kW (CCS Type 2). This aligns well with your 'Medium' fast-charging priority and 'Medium' distance priority, ensuring a quick and efficient charge without significant deviation from your route. Due to the absence of the EV's range and specific charging tariffs, estimated charging cost and time cannot be provided accurately, but this station offers the fastest charging speed among the available options for the

quickest turnaround.

4. Charging Station Comparison

| Station                 | Power  | Status                                           | Detour  | Cost | Time  | Food |
|-------------------------|--------|--------------------------------------------------|---------|------|-------|------|
| Rajahmundry unit -1     | 240 kW | Live charger availability could not be verified. | 2.6 km  | ■0   | 0 min | 0    |
| Chargex Chrging Station | 240 kW | Live charger availability could not be verified. | 7.22 km | ■0   | 0 min | 0    |

5. Restaurant Information

No restaurant information was available for the selected charging stations.

6. Important Note

Charging cost, charging time and battery consumption are estimates. Actual values may vary depending on vehicle efficiency, traffic, weather, battery condition, charging curves, station tariffs and charger availability.

Live charger availability is shown only when live-status data is available. OpenChargeMap station information may not represent real-time charger occupancy.
